(54) Title: COVER FOR ELECTRIC ACCUMULATOR WITH FREE ELECTROLYTE AND RELATIVE ACCUMULATOR

(57) Abstract: The invention concerns a cover (2, 200, 201, 203, 204) for an electric accumulator (1, 100, 101, 102, 103, 104) and an accumulator (1, 100, 101, 102, 103, 104). The cover has a valve device (9) having an inlet (10) that communicates with the cells (5) of the accumulator and an outlet communicating (11) with the external environment (A), the valve device being adapted to prevent the leaking of electrolyte (E) from the cells (5) and to allow the disposal to the outside of the gases that develop inside the accumulator (1, 100, 101, 102, 103, 104) when the pressure in the cells (5) exceeds a predetermined value.
